Profile

I am a Software Engineer and Junior Front-End Developer with experience in React.js, HTML, CSS, JavaScript, Git, and GitHub. I focus on creating highly usable and responsive websites that provide an excellent user experience. Passionate about continuous learning and innovation, I am dedicated to building efficient and visually appealing web applications.

Education

Bachelor of Software Engineering

Nov 2021 - Present

College of Engineering | Salahaddin University-Erbil

Work Experience

Front-end web developer

May 2023 - Sep 2023

TechnoBase, Erbil

- Developed and implemented responsive web designs using HTML, CSS, and JavaScript to improve user experience and accessibility across multiple platforms.
- Collaborated with cross-functional teams to brainstorm, design, and execute innovative solutions for client websites, resulting in increased user engagement and conversion rates.
- Conducted thorough testing and troubleshooting of website functionality to ensure optimal performance and seamless navigation for end users.
- Stayed current on emerging technologies and trends in front-end development to incorporate best practices and enhance the overall design and functionality of web projects.

Personal Projects

Quiz Application using React

- Developed a quiz application using React.js, allowing users to answer questions and receive immediate feedback.
- Implemented features such as timer, and a scoring system to enhance user engagement.

Pizza Ordering Website using React

- Designed and developed a pizza ordering website using React.js, providing users with a seamless and intuitive ordering experience.
- Implemented features such as customizable pizza options, real-time updates on order status, and secure payment processing.
- Ensured adherence to clean code principles and maintained the codebase for scalability and future enhancements.

Portfolio and Blog Page

- Designed and developed a personal portfolio and blog page showcasing projects, skills, and experiences.
- Utilized modern web development technologies such as React.js, Tailwind CSS, Bootstrap, and Next.js to create a visually appealing and responsive layout.

Currency Exchange

- Developed a responsive web application to display currency exchange rates using HTML, CSS, and JavaScript.
- The application fetches real-time exchange rates from an external API and presents them in a clean, user-friendly interface designed with CSS, ensuring a seamless experience across different devices.
- Utilized JavaScript for dynamic updates and efficient data handling, showcasing my ability to integrate front-end technologies and work with external data sources to create functional and visually appealing web applications.
